ARU HRMS

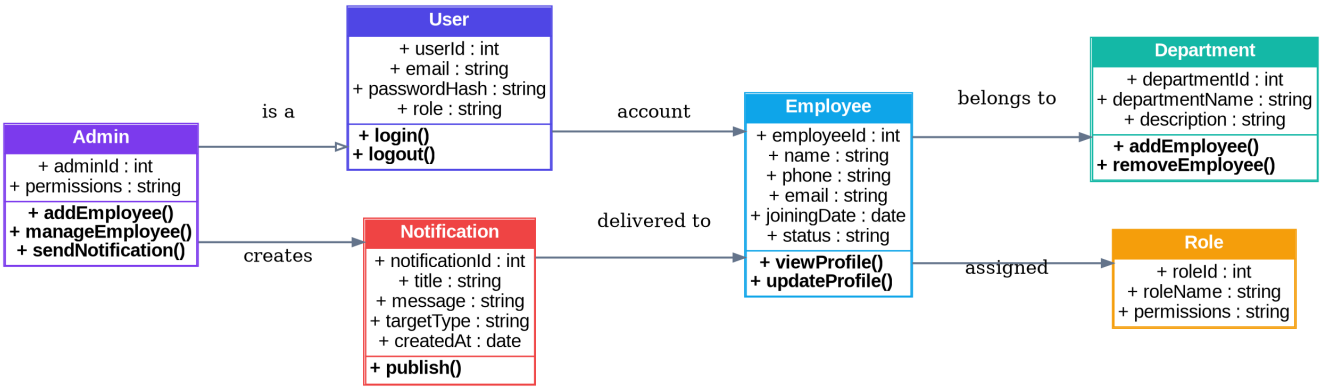

UML DIAGRAMS — PROFESSIONAL SYSTEM DESIGN

Project	Human Resources Management System
Document	UML Design Diagram Set
Diagrams	Class • Activity • Object • Use Case • Sequence • State Chart
Architecture	Web UI • Node.js API • MySQL

Prepared as a professional academic UML reference for the Aru HRMS project.

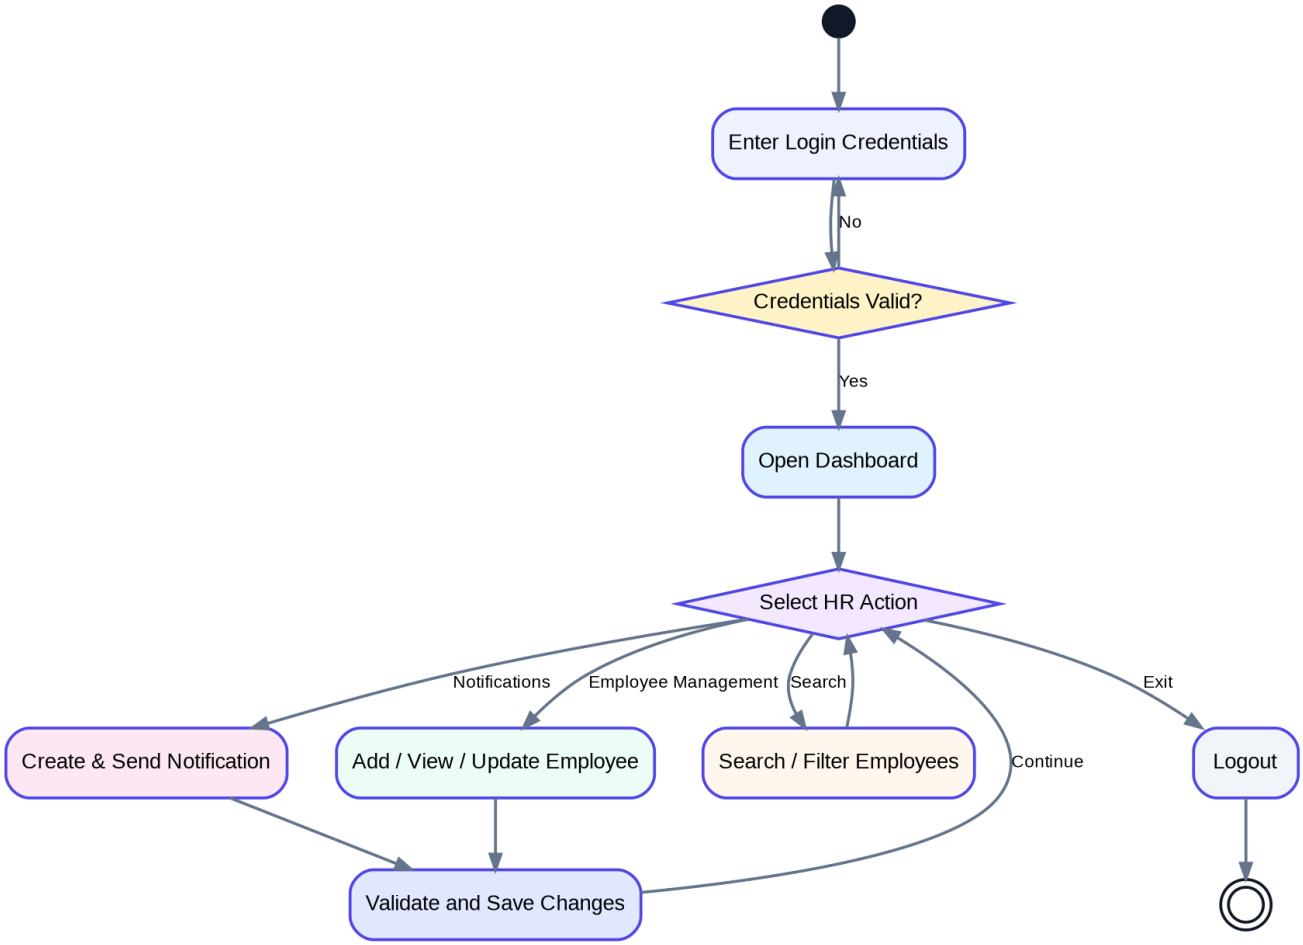

UML Class Diagram

Shows the static structure of the HRMS, including users, employees, departments, roles and notifications.

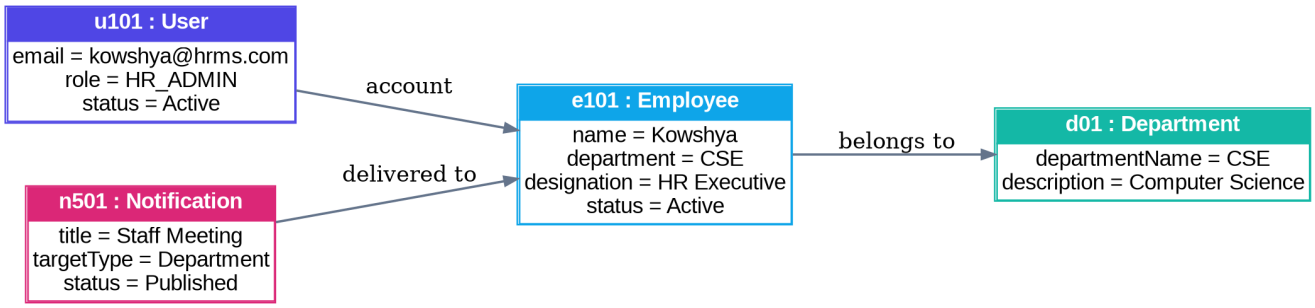

UML Activity Diagram

Shows the main HR/Admin workflow from login through employee operations, notifications, search and logout.

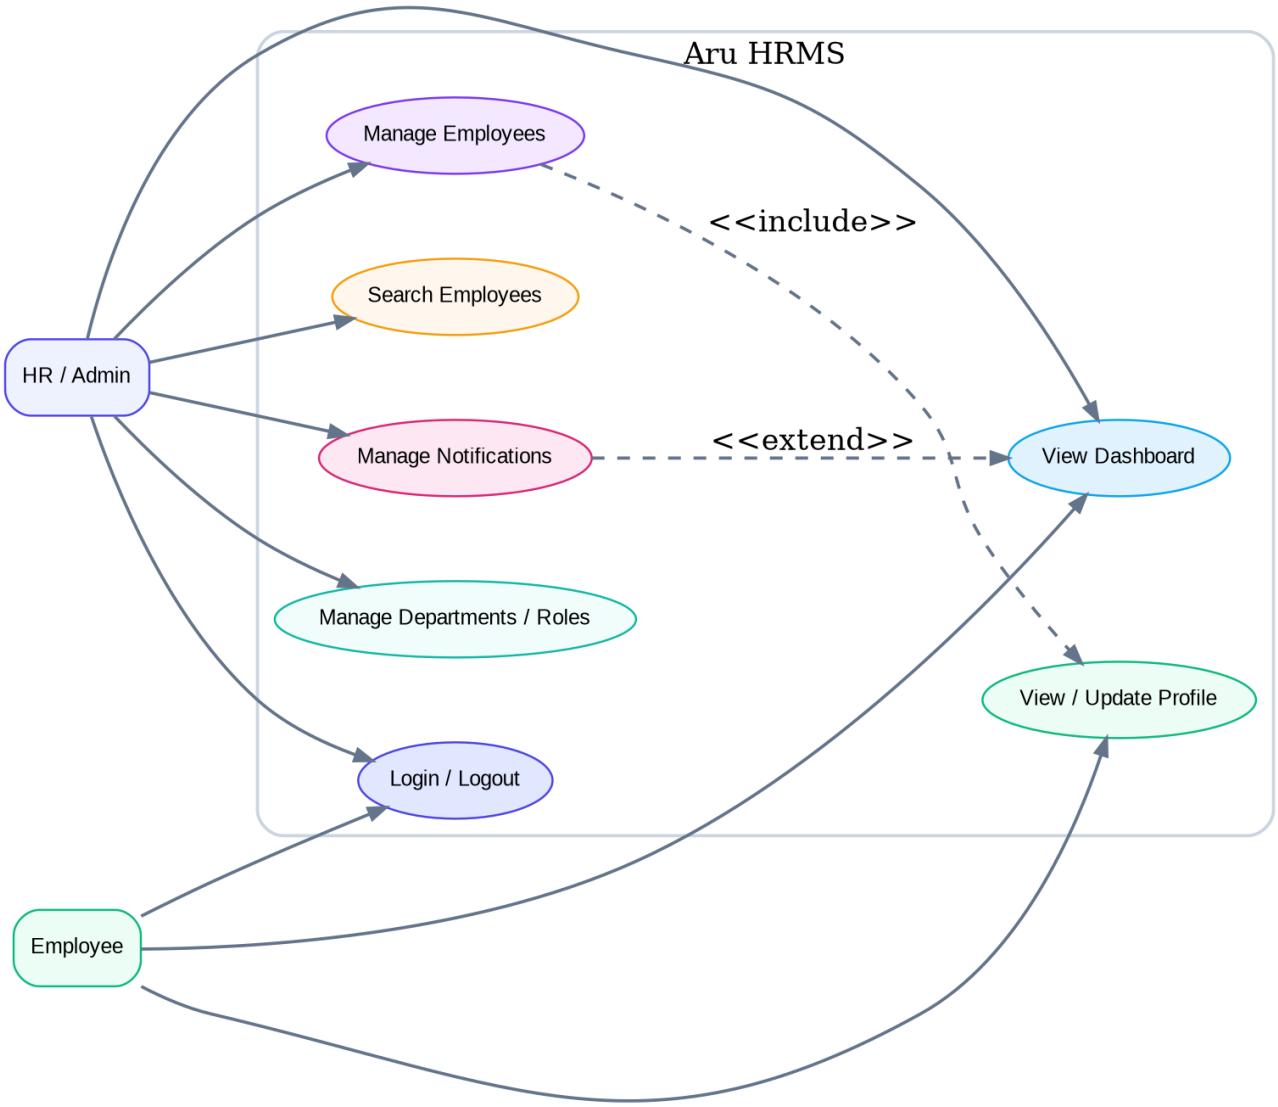

UML Object Diagram

Shows a sample runtime snapshot with concrete HRMS objects and their relationships.

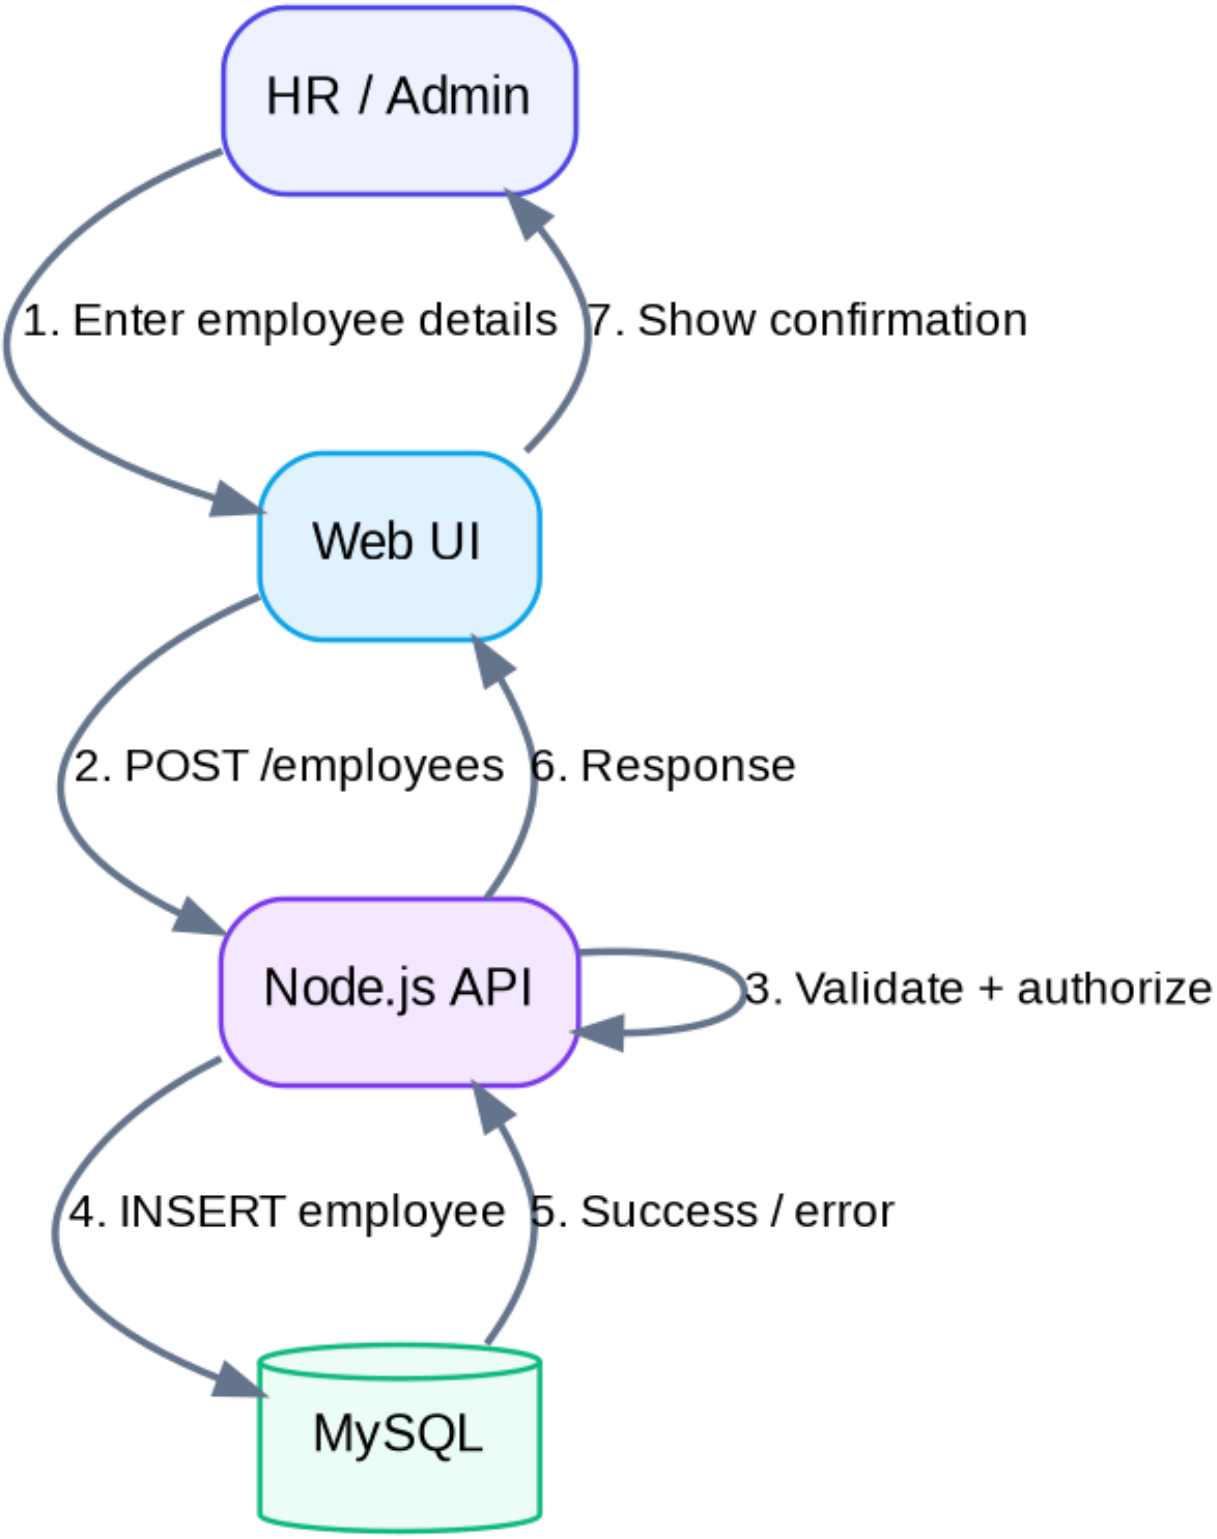

UML Use Case Diagram

Shows the main interactions between HR/Admin, Employee and the HRMS functions.

UML Sequence Diagram

Shows the interaction flow for adding an employee through the Web UI, Node.js API and MySQL database.

UML State Chart Diagram

Shows the employee-management session states from login through editing, validation, saving and logout.
